Morgan Stanley

Paul Walsh
Associate Director of Research,
Morgan Stanley

The European investment market: Volatility, growth and opportunity

10:00 - 10:30  Leadenhall Hub

● **Keynote**

In an ever-evolving European market, businesses face currency fluctuations, disrupted supply chains and unpredictable consumer behaviour. The risks are clear, but uncertainties also open the door to growth and innovation. In this session, panelists will discuss the alternative data sources delivering actionable insights into geopolitical trends, empowering investors to leverage volatility for strategic advantage.

A real China: From space to insight

11:20 - 11:40  Threadneedle Hub

 Data buyers

This session will examine how alternative data sources can address the global research gap in Chinese markets, alleviating institutional investors' data pain points. Skysight Technologies will showcase how use of dynamic satellite imagery technology to conduct real-time tracking and monitoring, can provide decision-making support for financial investment institutions.

Julie Liu
Chief Marketing Officer, Skysight
Technology

This session will explore the advantages of leveraging both app and web data in tandem, when doing investment due diligence. Andrew will touch upon analysis that utilises Sensor Tower's True Audience Estimate, which deduplicates users across web and app to uncover one true digital user figure.

Andrew Sprague
Head of Investor Vertical, Sensor Tower

Transaction data: Tracking grocery and general merchandising retailers

12:00 - 12:20 Leadenhall Hub

● Keynote

Finn Cousins
Research Analyst, Neudata

Patterns and predictions: Unlocking the power of consumer data

12:20 - 12:50 Leadenhall Hub

● Keynote

Consumer transactional and behavioral data remains one of the most popular and widely deployed categories of alternative data, providing indicators for both short-term trading decisions and long-term valuations. This panel will explore the key dataset types helping investors to understand and react to current market trends, whilst predicting future performance and economic shifts.

Aditi Sawhney

Alternative perspectives for private equity

11:40 - 12:20 Threadneedle Hub

● Keynote

2024 saw major activity in the private markets space. With rebounding valuation levels, the continued expansion of AI and an expected M&A surge, 2025 brings no signs of slowing down. This session will explore how private equity firms are using alternative data sources to better inform new strategies, from deal sourcing to diligence and value creation.

Lunch and learn: How investors use gig mobility data to understand consumer behaviour

1:00 - 1:40  Exhibition Area  Data buyers

The gig economy is set to surpass \$873 billion by 2027, marking it as one of the fastest-growing sectors globally. Yet insights on gig mobility remain largely inaccessible and fragmented. In this session, we'll explore how investors are harnessing gig mobility data to gain a differentiated view of the market and uncover insights into the performance of hundreds of publicly traded and thousands of privately held companies worldwide.

1:50

The multimodal economist - A worldwide case study

1:50 - 2:10  Leadenhall Hub  Keynote

With government data quality declining due to low survey response rates and budget cuts, understanding the effects of growth, inflation, geopolitical shifts, and policy shocks on the worldwide economy is increasingly difficult for asset managers. This session will

discuss an innovative multimodal AI approach, designed to increase the depth and breadth of domain expertise, while maintaining explainability. The demonstration will track global labour markets - generating JOLTS+ data and the effect of Trump administration policies - in real-time.

Apurv Jain
Founder and CEO, MacroXStudio

How investors are using alternative data to track industrials companies

2:10 - 2:30 📍 Leadenhall Hub ● Keynote

This session will outline global trends impacting the industrials sector, including trade policies, geopolitics and supply chains. What are the common challenges faced by investors looking to track this industry and which dataset types are growing in popularity and impact?

Matt Yome
Research Analyst, Neudata

ESG data in 2025: Declining demand or more relevant than ever?

2:30 - 2:50 📍 Leadenhall Hub ● Keynote

The continued rise of ESG investing has fueled a new branch of alternative data, but despite growing popularity, ESG policies and practices continue to attract criticism from many. This session will consider some of the problems with ESG data, look at the current regulatory landscape and highlight the potential advantages and use cases for risk mitigation and alpha generation.

Antti Savilaakso
Co-founder and Head of Research
& Data, Impact Cubed

The future of data through a quant lens

2:50 - 3:30 📍 Leadenhall Hub ● Keynote

As technological advancement continues to have a profound impact on the evolution of quantitative investing, how are funds leveraging alternative data to deliver alpha and manage risks? What challenges do quants face in sourcing and integrating new datasets? How can artificial intelligence optimise investment strategies and where does human oversight remain essential?

AI-Washing in focus: Reviewing the impact of artificial intelligence

4:20 - 5:00  Leadenhall Hub  Keynote

Amid the AI-boom, some companies have faced accusations of 'AI-Washing', or falsely overstating the use of Artificial Intelligence to capitalize on the attention this trending technology attracts. How can alternative data help to expose AI innovation vs hype? Where is AI having a tangible impact on data optimisation in the investment sector? What shifts are we seeing in the regulatory landscape?
